EDUCATION

FULL STACK WEB-DEVELOPEMENT

Masai School

July 2022-present

B.A.

Bundelkhand University

July 2019 - May 2022

TECHNICAL SKILLS

Responsive Web Design | CSS3 | HTML5 | RESTful APIs | MongoDB | Express.js | Node.js | Git | React | JavaScript

SOFT SKILLS

Time Management | Attention to Detail | Adaptability | Teamwork | Problem Solving | Effective Communication

INTERESTS

- Chess
- Travelling

CERTIFICATIONS

- Zoom Marathon Challenge

Prashant Kumar Yadav

Full Stack Web Developer

PROFESSIONAL SUMMARY

Dedicated full-stack web developer with advanced proficiency in the MERN stack, excelling in collaborative environments. Adept in generating innovative applications using React.js and Node.js, integrating seamless frontend-backend systems. Quick learner of cutting-edge tech, including Generative AI, ensuring robust and efficient solutions.

PROJECTS

1. Doctor Appointment System | ⊕ | ⓖ
JavaScript | React | Redux | Node.js | Git | Express.js | MongoDB | RESTful APIs | Responsive Web Design

- Built a role-based access system allowing for distinct functionalities for admin, doctor, and patient, using React and Redux for frontend development.
- Designed and developed server-side APIs using Node.js and Express.js, ensuring secure data handling and role verification.
- Established a MongoDB database to manage user profiles, appointment scheduling, and role verifications, focusing on efficient query optimization.
- Integrated the frontend and backend components seamlessly, facilitating smooth user interactions.
- Implemented a verification process to approve or reject doctor applications, aligning with project requirements.

2. AI CODE WIZARD | ⊕ | ⓖ
JavaScript | React | Node.js | Express.js | MongoDB | RESTful APIs | Responsive Web Design

- Created a comprehensive web application enabling code conversion, quality checking, and debugging with React for frontend components.
- Developed robust server-side APIs using Node.js and Express.js for handling code processing and AI-driven functionalities.
- Managed and optimized MongoDB databases for storing user data, code snippets, and AI-generated suggestions.
- Ensured seamless interaction between frontend users and backend services, enhancing user experience with real-time operations.
- Implemented secure authentication protocols including signup/login and email verification, ensuring platform security.
